Atlantic City to Host February 13th Public Information Center on 2024 Road Projects

Atlantic City, N.J. (February 6, 2024) – The Atlantic City Engineering Office will host a Public Information Center on Tuesday, February 13, 2024 at the Atlantic Cape Community College Worthington Campus (1535 Bacharach Boulevard) between 5:00 p.m. and 7:00 p.m. detailing three upcoming road projects. The Public Information Center will be conducted as an open house, where residents and local business owners are welcome to stop by at their convenience during these hours to review the plans for the 2024 road projects listed below. The consulting engineers, along with city engineering staff, will be available to provide information and answer questions from the public. The public will then have the opportunity to comment on the project plans.

Atlantic Avenue Safety Improvements

This project includes the milling and paving of Atlantic Avenue from Tennessee to Albany Avenues, as well as the synchronization of signals on Atlantic Avenue from Maine to Albany Avenues, enhanced streetlighting from Tennessee to Albany Avenues, and a three-lane “Road Diet” configuration from Mississippi to Albany Avenues. The five-lane configuration will remain from Tennessee to Mississippi Avenues.

Baltic Avenue Improvements

This project includes milling and paving the full width of the Baltic Avenue from Maine to Missouri Avenues, upgrading ADA ramps, thermoplastic striping and sidewalk and curb improvements where needed.

Pacific Avenue Signal Optimization

This project includes installation of fiber optic cable and the synchronization of signals on Pacific Avenue from Hartford to Massachusetts Avenues. In addition, fiber will be installed between Pacific Avenue and City Hall and the Public Safety Building to manage the system. Full width paving restoration will occur on any roads impacted by the fiber installation.
